RZU

The RZU region lies at the heart of the Zurich Metropolitan Area and covers an area of 697 km². It includes the city of Zurich and the 70 municipalities of the six planning regions surrounding Furttal, Glattal, Knonaueramt, Limmattal, Pfannenstil and Zimmerberg with a total of 950,000 inhabitants (2014) and approximately 759'000 employees (2012). The RZU constitutes 39% of the Canton area, there live there but 66% of the population. More maps illustrate the spatial context of RZU within the agglomeration, the Metropolitan Area and Switzerland.

Regional Planning Zurich and surroundings (RZU)

The Regional Planning Zurich and surroundings (RZU) is a planning associations of which the city of Zurich, the six neighboring planning regions Furttal, Glattal, panhandle, Zimmerberg, Knonaueramt and Limmattal and the Canton of Zurich have come together. The area comprises a total of RZU approximately 950,000 inhabitants (2014) and about 759'000 (2012) employees.

The RZU is a center of excellence in matters of spatial development and is committed to a sustainable livable and competitive agglomeration of Zurich. She carries out projects which are in the general interest, supports the planning activities of its members and promotes their coordination. The association advises the affiliated members through his office.

The purpose of RZU exists both in the drafting of a mission statement for the metropolitan area of Zurich, as well as in the processing and execution of planning tasks with total regional importance. In addition, the RZU to promote cooperation among its members and coordinate and represent their desires in planning issues.

The RZU shows as a sensor, thinking and discussion platform for planning issues in the greater Zurich area important spatial developments, launches initiative projects and working procedure proposals. It promotes the overall spatial approach with a focus on the field of RZU, the agglomeration of Zurich and the position of the agglomeration of Zurich in Switzerland. In addition, the RZU creates transparency with respect to the projects, activities and interests of its members and represents them to the outside world. To this end, they will intervene if necessary even with political actors.

Integrated target image 2030, the Regio - ROK

The abbreviation "Regio - ROK" stands for regional spatial concepts the RZU - regions created in the course of the overall review of the regional indicative plans

Landscape

Landscape themes

The thematic map landscape shows that its elements in the integrated Target image 2030 together into a coherent landscape system of RZU area . It can be clearly seen that the settlement oriented clearances arranged in the vicinity of settlements are and then from there away from the landscape -oriented open spaces or the be replaced landscape spaces .

Differenz zwischen dem Ist-Zustand aus dem Projekt Landschaftssystem_RZU und dem integrierten Zielbild 2030, Themenkarte Landschaft

Veränderungen in der Zuordnung zu den sekundären Freiraumstrukturen und zusätzliche Landschaftsflächen

Landscape differences

The difference map landscape shows the difference between the landscape today and in 2030. For the presentation of the destination state in 2030 was unchanged topics Map are used. A similar picture for the actual state of the landscape had from another source , the Landschaftssystem RZU project.

Superposition of the integrated target image 2030 with the 5 areas of action of the ROK ZH

This report compares the integrated target image 2030 (as of 2012) with the Spatial Development Perspective the Canton of Zurich (ZH ROK ; Stand : 28.03.2012) . The comparison aims determine whether and to what extent a vertical coordination between the integrated Target image 2030 and the ROK ZH present. For this purpose, the following questions were investigated:

If the spatial requirements in the integrated target image 2030 with the statements in ROK ZH agree?

Is the integrated target image 2030 - as requested by the cantonal structure plan - a concretization and differentiation of the Cantonal Spatial Development Perspective?

Superposition of the integrated target image 2030 with the 5 areas of action of the ROK ZH
