

Welcome to the launching workshop of the METREX Expert Group on Metropolitan Climate Challenge (18 May 2022)!

The low carbon cities and metropolitan areas of tomorrow must be planned today. The new METREX Expert Group on Metropolitan Climate Challenge aims to strengthen metropolitan and regional cooperation on climate change and to create a platform for climate change issues relevant for METREX regions.

The group will combine strategic spatial planning and climate change expertise, so we hope that representatives in these fields from METREX regions will be widely involved in the group.

The group is initiated by the Gothenburg Region, Region Stockholm and Helsinki-Uusimaa, and it is currently coordinated by Helsinki-Uusimaa.

Are our current plans transformative enough?

METREX members are invited to join the group's launching workshop at the Turin Spring Conference and online on **the 18th of May, 12:00-13.30 CET**. In the workshop, ideas and expectations for the group's work and topics will be discussed.

IPCC and urban planning?

To ensure proper arrangements, we request that you register for the workshop. Please note that you can participate **on site in Turin** or **online**. [Use this link to register](#) (online or on-site in Turin).

Due to technical restrictions, to create a 'hybrid' meeting, we anticipate that every participant will need to bring a laptop and log in to a Teams meeting.

How to support socially just urban climate transition?

If you cannot participate in the workshop but still wish to give input to the workshop or be added to the group's mailing list, please contact Liisa Perjo, coordinator at Helsinki-Uusimaa Regional Council, liisa.perjo@uudenmaanliitto.fi.

More information about the expert group will soon be available at the METREX website.

Can we reach our ambitious metropolitan climate goals, and do we know what we have to do?

Looking forward to learning together on how metropolitan regions can meet climate challenges!
